NUMBER 275

Anna Dickinson is getting well, they say. When she fully recovers, she will come out west and give readings, and try and recover the reputation she lost in trying to act Hamlet.

It is hoped that the bureau of labor statistics bill will not pass the legislature in its present form. It provides for too cheap a commissioner. His work would be as cheap as his salary, would be low.

The public debt was increased \$13,500,000 during the month of January. The better part of economy and statesmanship would be to reduce the internal revenue tax and pay less of the public for the present.

The civil service will was a great misfortune to the democrats. It secures to the republicans all the offices they now hold, and keeps the democrats from reaping all the spoils even should they carry carry the country in 1884.

An interest bill making the collectable rate six and the contract rate eight per cent, instead of seven and ten as now, has been ordered to a third reading in the assembly. We presume it will finally meet the end which all such bills have met for many years past.

They are trying to prove at the Newhall house inquest that it was one of the safest hotels in the country. The fatality in that appalling calamity doesn't agree with the testimony, for in the flames went down more lives than in any hotel ever burned in the United States. It is easy for interested persons to land the safety of the hotel, but the 72 dead bodies tell a different tale.

The democratic state treasurer of Tennessee played such a large game in defalcation, that the democratic state treasurer of Alabama, thought he would go him one better, and therefore squandered \$227,000, and silently stole away. It will always be noticed that when one of these democratic treasurers in the south steals, he takes all within his reach. The last remark won't apply to the state treasurer of Texas, who holds \$1,000,000 and refuses to run away with it.

The Fitz John Porter bill sticks upon the speaker's table. If Mr. Porter wants his bill taken up with alacrity by the house, he must contrive to work a steal into it.—*Madison Democrat.*

If it should fail to be concurred in by the house this session, the very fact that he tried to cripple the union forces in 1862 by disobeying orders, will make him popular with a democratic house, and mind you, if the bill comes up next year, it will pass.

The state senate is wise. It has decided by a vote of 17 to 15 to show decent respect to the late constitutional amendment, and therefore killed the assembly joint resolution authorizing the superintendent of public property to sell to each of the members of the legislature five dollars worth of stationery and postage stamps at cost price. This is carrying out the letter and spirit of the constitution, and we are all glad to note that Assemblymen Hasty and Conley voted against the scheme in the assembly, and that Senator Lord helped to kill it in the senate.

The State Journal says that a bill to incorporate the city of Black River Falls was rushed through the senate on double quick time. It was introduced, referred to the proper committee, reported back to the senate with a recommendation that it pass, was passed under suspension of the rules and message to the assembly, all within half an hour's time. There is bad blood in that bill—some little private scheming—and it should never have been sent through the senate on a run like that. A bill that can't abide its time and endure the test of close scrutiny, should be killed at once.

Why the whisky men are on the rugged edge from the Milwaukee Sentinel: "The whisky men are in distress at the failure of congress to pass what is known as the bonded-spirits bill. Unless it passes, which is now improbable, before the 6th inst., they must withdraw from bond on that date, some \$30,000 gallons of spirits on which the tax is nearly \$800,000. Further withdrawals occur each month so that if the bill fails the trade will have to withdraw 13,000,000 of gallons before congress meets in December next, and pay some \$11,000,000 in taxes. Their efforts for relief are urgent and vehement. The trouble with them is that they have been making too much whisky."

A bill has been introduced in the senate by Dr. Lord relating to court records in cases of a change of venue is designed to furnish a remedy for a long needed reform. As the law now stands there is no provision for a return of the papers and records in a case to the court where the action originated. When such action involves the transfer of real estate, this occasions great trouble, it being frequently necessary to consult the records for further proceedings in the county where the property lies. This bill provides for a return of the records in the case to the county where the action commenced, as well as the filing of a transcript of the proceedings of the court to which the case was removed.

Nebraska has settled her senatorial contest by the nomination and election of General Charles F. Manderson, of Omaha. He is a lawyer by profession and is only 46 years old. He was born in Philadelphia, and was admitted to the bar at Cauton, Ohio. At the breaking

out of the war, he enlisted and raised a company for the nineteenth Ohio volunteers. He served through the war, was severely wounded at the battle of Lovejoy Station, September, 1864, and was made a brigadier general by brevet for gallant services. When the war closed he resumed the practice of his profession at Cauton, and removed to Nebraska in 1866. He is a strong republican, but in the usual meaning of the term, he is not a politician.

The public debt was increased \$13,500,000 during the month of January. The better part of economy and statesmanship would be to reduce the internal revenue tax and pay less of the public for the present.

SHIPS ON FIRE.

An Alarming Outbreak at the Inman Wharves in New York.

Nearly the Whole Extinguishing Apparatus of the Metropolis Called Upon.

Total Destruction of the Steamship Egypt—Spectacle of the Vessel in Flames.

New York, Feb. 1, 2:30 a.m.—A large fire is raging at the docks near Canal street. The sheds, stores, and shipping are all ablaze. The loss will be very heavy. Many fire alarms have been sounded, calling the firemen and apparatus from all parts of the city. Tug-boats and ferry-boats are steaming up and down the river to the scene of the conflagration in hopes of rescuing imperiled ships. The river fire-boats are already at work, but the heat from the flames makes effective work difficult.

3 a.m.—The fire is at the Inman steamship dock. The steamship Egypt is being hauled out. She is apparently all on fire from stem to stern, and from the deck to the royal top. The ship spars bear the blaze from another vessel to another. Some of the ship in danger may be saved, but it is hard work from the remotest parts up-town apparatus is thundering down. There are more engines now at the scene than can be accommodated with water, with the strength of the million. Explosions are frequent, especially the work of the French artificers. The fire on the docks is extending. The property there is about to be lost. The tug-boats are doing their best. The famous fast-steamer Alaska is to port. Great efforts are making to save her.

3 a.m.—The fire broke out (from what cause is not known) in the carpenter shop on the Inman company's pier at the foot of Charlton street, which at a point where shipping of this nature is loaded with coal, is a veritable emporium of warehouses filled with goods of every description stand very close to one another. At the time the flames were discovered and the alarm given, the pier fire-houses was beyond that point where there was any possibility of saving it. An alarm was at once turned on, and the firemen, pending the arrival of the engine, the alarm was turned on the clock, were turned to saving all the portable property of the companies, and the customs office. The steamship Egypt, of the national company's line, and which was some time ago captured by the Inman company, was being towed along side the pier. It was quite evident from the headway the flames had secured that the steamer must be destroyed unless she could be got into the stream without delay. The fire had already worked its way towards her, and once the inflammable material of her rigging might allow of her being given over to the element. It allowed of removing her, but she was, the fire from the Egypt must communicate with shipping by Egypt and also the freight-houses of the neighboring steamship companies. The fire department had meantime reached the scene, three alarms having been given, and a tug-tug in the river was summoned. The tug-steamer, and tugs—men were passed to the Egypt. The bargee connecting the steamer to the pier were then thrown off, but before she could be towed off the birth of the flames from the freight house, which rolled on with marvellous rapidity, jumped into the rigging of the Egypt, and took hold of the deck. The steamship was then towed into the stream, the flames running swiftly up the rigging and gaining headway elsewhere as she came into the breeze sweeping along the river, the spectacle was one of grandeur. It became clear to the people on the tug that she was a goner. The tug-steamer, and tugs—men were passed to the Egypt. The bargee connecting the steamer to the pier were then thrown off, but before she could be towed off the birth of the flames from the freight house, which rolled on with marvellous rapidity, jumped into the rigging of the Egypt, and took hold of the deck. The steamship was then towed into the stream, the flames running swiftly up the rigging and gaining headway elsewhere as she came into the breeze sweeping along the river, the spectacle was one of grandeur. NAPOLEON V.

The Text of the Manifesto of Prince Napoleon.

The Appeal to the People Which Brought About His Arrest.

New York, Feb. 1.—The Courier des Etats-Unis has received a copy of the recent manifesto of Prince Napoleon, which stirred up so much excitement in France and was the cause of the arrest and imprisonment of the author. Following is a translation:

To My FELLOW CITIZENS.—PARIS, Jan. 15, 1883.—France languishes. Some of those who suffer are stirring. The great majority of the nation are disgusted. Without confidence in the present, they seem to wait a future that they will only be able to obtain by a virile revolution. The executive power is enfeebled, incapable and impotent. The chambers are without direction and without will. The party in power set at naught its own principles, only seeking to satisfy the least noble of passions. The parliament is split up into a countless number of fragments. Reactionaries, Moderates, Radicals have in turn taken the government. All have been wrecked. You have been promised a republic which should build up and reform. A living promise that:

You see continual crises which involve the chief of the state, the ministers and the chambers. The experience of the parliamentary republic carried through twelve years is complete. You have no government.

The evil is in the constitution which gives over the country to the discretion of eight hundred senators and deputies. Faults have been committed in the past. Why aggravate them instead of taking warning from them? The army, the foundation of our greatness and of our security, is the hand of an impotent master. For ten years they have been disorganized, its organization and armament now forced—after blunders which ruin the military spirit—to find a new law of recruiting.

The administration is discredited. The officials are the slaves of the partiest parties interests. To make the most for one's self out of a administration, it is necessary to contrive to be in the favor of those who are independent of the iron industry, and with the securities to which they are entitled, loyalty to their duties. Our finances are shaken. The taxes, heavily and badly distributed, are kept up in a fatal spirit of routine which puts a bar to all progress. The public debt is increased, increased without justice. The most elementary conditions of the public credit are ignored. Stockjobbing, which often overreaches impunity to the compromising nature of its ramifications, has overrun all classes of society. The floating debts swollen to a sum which threatens our credit at the first shock. In spite of the enormous taxes the budget shows a deficit.

Religion, attacked by a persecuting alienism is not protected. And nevertheless this great interest of all civilized society is easier to guard than any other by fidelity to the Concordat which can give us religious peace. Social questions, vital to our welfare, are wholly left out of consideration. Interests in the regulation of burdens to the advantage of society. The distribution of burdens to a sum which threatens our credit at the first shock. In spite of the enormous taxes the budget shows a deficit.

Our foreign policy is one of bad faith with the foolish. It is in the service of private speculators. The South. The costly occupation of the country is without profit. Our policy is cowardly and indecisive. The interests of France are important. We cannot review our relations with other countries without a feeling of profound sadness. Our France, but just now so great, has to-day neither friends nor prestige. Even among well-disposed men there is more indifference more painful than hostility. France must have a place in the world. We shall regain our position abroad only by setting things right at home. This situation of affairs is caused by the abandonment of the principle of national sovereignty. So long as the people do not speak France will never lift up her head.

Honor of Napoleon the First and Napoleon the Third. I am the only man living whose name has secured over three millions three hundred thousand votes. Since the death of the Emperor's son, I have kept silence in regard to the policy of the state. Not wishing to interfere with the developments which were under way, I have been writing in defense of the Emperor. The course of events should call for me. My silence was only the patriotic expression of my respect for the repose of the country. My conduct, my opinions, my sentiments have been systematically traduced. Unmoved, I have always replied by contempt to those who have sought to discredit me. An attempt to set sons against their father. I have felt it a duty to impose silence upon the young heads reviled by such inscriptions. I have preferred to be alone in the face of our adversaries. My sons have been as yet strangers to politics. The natural order designates the son after the father, and they will not fail in this. The principles of Napoleon have been spoken of, but it will not take place. When a man has more dignity than rights, abdication is desert.

Such an attitude, such recognition of mutual obligations, would be becoming to the princes who think they have rights superior to the will of the people. Napoleon, the chosen of the people, the sons of whom would not conduct themselves like those princes.

Two principles divide the world. One admits a right superior to the will of the people. The other puts the source of all power in that sovereignty. I respect the one which the principles are not allowed to confine in France. The representatives of the past have made it impossible. There is nothing doubtful in their attitude. No union with partisans of the white flag, the only emblem of the house of Bourbon, is possible. If there are differences among the supporters of a national sovereignty there are none between them and the people. The Napoleons defend the sacred sovereignty of the people. That principle has been abandoned by a great many republicans solely because of their fear of popular votes. That which a plebiscite established a new plebiscite can also restore. I do not suppose a party, but a cause and a principle. The cause of the Emperor is greater than my own. The principle is that of the people and the people to name their chief. To deny that right is to attack the national sovereignty.

The government is giving way but a great democracy such as ours can not long escape from the necessity of establishing authority. The people feel that they have proved it in the plebiscites of 1850, 1852, 1854, 1855, 1856, 1858, 1860, 1872.

Frenchmen remember the words of Napoleon the First: "All that is done without the people is illegitimate."

NAPOLEON.

Starvation in Ireland.

LONDON, Feb. 1.—Justice McCarthy said at a meeting held here Tuesday night to devise means for the relief of the distress in Ireland, that he anticipated the pinch of famine would be felt in February and March. O'Donnell, Irish member of parliament, in a violent attack, told the government charged that it had millions to spare for succoring Egyptians, but none for relief to Ireland.

The Oklahomites.

WICHITA, Kan., Feb. 1.—Between 300 and 400 men and 100 two-horse wagons are camped on the Walnut river, one mile from Arkansas City, ready for a forward march to Oklahoma. Parties have been concentrating at this point since Monday. There are three doctors, a lawyer, three ladies, and one little girl and two newspaper men. The "boomers" had chiefly from Kansas, a few coming from Missouri. They are well supplied with provisions, arms, etc. They are to meet the rifle-rat of the frontier, but are a substantial and respectable body of men, many of them of substantial and good education. A meeting has been called for the election of officers. Capt. Dave Payne will undoubtedly be made chief. This party expects to form a junction with the Kansas City organization and other bodies from Texas and the proposed location "the boomers" expect to find Oklahoma from one thousand to four thousandဟ.

There is one determination manifested to stay if a lodgment is effected. For a month

there will be a rush from all parts of the state. The action of the government has served only to increase the force and possession of this land, and this will continue to do until the government definitely fixes the status of the land now in dispute.

THE TARIFF.

A Powerful Lobby Haunting the Cabinet in the Interest of the Tariff Bill.

WASHINGTON, Feb. 1.—The lobby about the Senate and House has been reinforced by new arrivals since the tariff bill has been under consideration in both houses, and their activity has in it the business solicitude that one sees in the vicinity of the stock markets of the great cities. As a rule they are a better class of lobbyists than have been accustomed to haunt the capital, being generally members of large manufacturing firms whose interest will be affected by the changes of tariff duties. They lack the skill in this kind of work that the professional lobbyists have acquired by long experience and complete knowledge of the methods of legislation, and therefore are not as successful in reaching the ears of the men whose judgment they seek to influence. They are easily deluded or discouraged by the axe and chisel of legislative manufacturers, because they do not understand them and are lost in a constant state of excitement and bewilderment. But there are a few of them who know the ground and work well. This class embraces the representatives of iron and sugar. The iron men have the strongest lobby, and those who are here are expert in their work. They have a week to run, and will be censured, but I have no idea of running away. I wish you would assist the committee, and after the balance is settled, to get the bill through the Senate and the House.

TO THE SENATE AND HOUSE OF REPRESENTATIVES: It becomes my painful and mortifying duty to inform you that Isaac H. Vincent, the treasurer of this state is short in his accounts and has lost the city. This fact was made known to me by Vincent himself in his office, dated the 23rd instant, which was received by Crawford on the afternoon of the 30th instant, and was communicated to me at 9 p.m. of that day:

"STATE OF ALABAMA, TREASURER'S DEPARTMENT, MONTGOMERY, Jan. 29, 1883.—H. D. CRAWFORD, Esq., in his office, dated the 23rd instant, which was received by Crawford on the afternoon of the 30th instant, and was communicated to me at 9 p.m. of that day:

COAL—Hard coal, seven twenty-five, Indiana block four fifty, Ohio, contra forty twenty-five, Willingdon association four dollars cash, delivered to any part of the city.

CLARK & HIJELD,

JANESVILLE, Wis., Jan. 16, 1883.

Members of Janesville Public Library Association:

You are hereby notified that the first meeting for the election of officers of the Public Library Association of Janesville, Wisconsin, (corporation) will be held at the library rooms, in Beumont's block, in the fourth ward of the city of Janesville, on Saturday, the 3rd day of February, 1883, at 8 o'clock in the afternoon. Your presence is requested.

Yours respectfully,
CONCESSION J. HAWES,
S. M. B. HOGBOOM.

The tickets for the grand masquerade ball of the Janesville Concordia society, which will take place on February 6, are now for sale at King's book store, Fred Sonnenborn's clothing house, and Baumann's saloon. Mrs. Franch, of Watertown, will be here on that day with a large assortment of costumes, a list of which can now be seen at the Messrs. Baumann's, and selections made. The committee in charge of the masquerade are arranging for the best party ever held in the city.

Look at our new combined spring bed and hair top mattress combined.

Take your easy chairs, lounges and parlor suits to the mattress factory for good repair work.

WANTED.—A boy to learn the printers trade at the Gazette office.

ICE.—J. W. Gateley will deliver ice to any part of the city; Orders left at R. W. Kings, or at his residence on Jackson street will receive prompt attention.

FOR SALE.—A large number of Rock county farms, desirable city residences and some business property in the city. Some of which will be sold at speculation prices.

H. H. BLANCHARD.

SELLING OUT.—As I am going out of the retail trade I shall commence on Monday, January 8th, to dispose of my entire stock of shoes and boots at prices utterly regardless of cost, for cash only. All who are indebted to me are requested to call and settle as soon as possible.

L. B. TREAT,
West End shoe dealer, No. 45 West Milwaukee street.

Jan. 8th, 1883

For hair, wool, cotton, palm leaf, eelskin or single or double mattresses call at the mattress factory.

Do not conflict our work with the work of other parties that have visited this city; all work done by us is guaranteed to be done just as ordered and in first-class shape. We employ none but the best of workmen and guarantee satisfaction.

MATTRESS FACTORY.
Next Rogers & Hutchinson.

Mother! Mother! Mother!!!
Are you disturbed at night and broken of your rest by a sick child suffering and crying with the excruciating pain of cutting teeth? If so, go at once and get a bottle of MRS. WINSLOW'S SOOTHING SYRUP. It will relieve the poor little sufferer immediately—dearly upon it there is no mistake about it. There is not a mother on earth who has ever used it, who will not tell you at once that it will regulate the bowels, and give rest to the mother, and relief and health to the child, use it magic. It is perfectly safe to use in all cases, and pleasant to the taste, and is the prescription of one of the oldest and best female physicians and nurses in the United States. Sold everywhere 25 cents a bottle—postpaid.

Specielets.

—February first.
—Good ice weather.
—Never mind the cold, coal is only \$1.25 per ton.
—Who said that we were going to have a January thaw?

—There was no business before the circuit court to-day.

—This weather keeps the gas men on the jump to keep the gas pipes from freezing up.

—What young man was it, who went west a short time since, and lost his grip-sack in a Missouri river town?

—Prof. Seaverance's dancing class and social were well attended last evening, and the young people were merry.

—The hanging paper distributed through the city by the agent of Miss Ada Gray, is the finest ever used in Janesville.

—The Mutual Improvement club have a social at the residence of Mr. James Harris, South Jackson street, this evening.

—The thermometer indicated twenty-three degrees below zero at seven o'clock this morning, and a good still breeze from the north.

—There were nine interments in Oakhill cemetery during the month of January, against fourteen for the corresponding month last year.

—Judge Bennett will open the circuit court for Jefferson county, in Jefferson on Monday next, for the regular February term of court.

—The threshing machine case was resumed in the municipal court to-day, and will probably occupy the court two or three days longer.

—Mr. John Spencer, justice of the peace, of Elgerton, was in the city today, and transacted some official business at the county clerk's office.

—The remains of the late Mrs. Frank P. Schicker can be viewed at the home of the deceased on Main street, from eleven to one o'clock on Friday.

—The Trinity church parish people will hold a social gathering at the residence of City Clerk Charles E. Church in the first ward, on Monday evening next.

—The Rev. Mr. Curtis expects to leave Florida this week, for Juviles, and will reach here sometime next week. Mrs. Curtis is doing well, the weather having a beneficial effect upon her.

—The Janesville silver plate company commenced the manufacture of their plated goods to-day. A full description of their works, will be found in another column of this evening's Gazette.

—We understand that the jury in the Emmons forgery case took four ballots last evening, the first ballot standing nine to three for conviction; the next two, eleven to one; and the fourth, of course, standing twelve to one for conviction.

—No news has been received to-day from Prof. Parker at River Dell, regarding the arrival of the remains of his mother. The railroads near River Falls are blocked with snow, and the last heard from Prof. Parker he did not know when he would start for Janesville.

—We are requested to call the attention of the city authorities to the impassable condition of the roads leading to the cemeteries. Funerals are compelled to go a roundabout way through fields, to reach the burial grounds, owing to the snow drifts which are allowed to blockade the roads.

—Mr. Joseph Gower, son of Mr. Daniel Gower, of the town of Rock, died at the home of his parents this morning, after a lingering illness of consumption, aged twenty-seven years. The funeral will be held on Saturday forenoon at eleven o'clock, at the residence of Daniel Gower in the town of Rock.

—The Beloit tramp who stole a pail of axle grease from Beloit Bros., on Tuesday night, and who was committed to the county jail for ten days by Police Justice Goodall, of Beloit, and sent here on Tuesday intrusted with his own commitment papers, was before the municipal court this morning. Judge Patten gave him fifteen days in jail, on a bread and water diet.

—Mr. John Ching Wing, one of the proprietors of the laundry in the Myers house block, received a box from China yesterday, and in it was a Chinese sword, the blade, the hilt and even the tassels, being formed by a very ingenious arrangement of Chinese coins. Ching Wing has presented the sword to Mrs. Myers who regards it as a very interesting souvenir.

—The case of the state vs. T. J. Emmons, charged with forging an order on the county treasurer, for \$4,500, the witness fees of William Schuman, of Dane county, in January, 1881, was concluded in the municipal court last evening at 8:30 o'clock, the jury finding a verdict of guilty against the defendant. The case was duly conducted by District Attorney John W. Sale, for the state, and Wm. Smith for the defense. The jury before whom the case was tried was composed of Messrs. William Eller, D. H. Wood, George Reese, Charles Biggs, Charles H. Lee, B. Spence, Thomas Tennant, W. T. Pomroy, Paul Rudolph, C. C. Peterson, James Whalen and O. K. Chapman. The punishment for this offence is not less than one year nor more than seven years in state prison. The prisoner has not yet been sentenced, and will not be until the motion for a new trial has been passed upon, which was made before the court adjourned last evening.

The Weather:

Reported by PRENTICE & EVANSON, Durators.

At seven o'clock this morning the thermometer registered 23 degrees below zero, and at one p.m. at 4 degrees below zero. Clear, with north wind.

For the same hours one year ago the register was 25 and 37 degrees above.

Washington, Feb. 1 a.m.—The following are the indications for to-day:

Upper lake region—Partly cloudy weather, occasional light snow, winds mostly northwesterly, higher pressure, stationary or lower temperature.

After plating, the work is prepared for the burnishing room. The figured work being deftly cleaned and polished by means of what is known as a scratch brush; the plain parts of the same are scoured with sea sand from the coast of

SILVER PLATE COMPANY.

A New Manufacturing Enterprise added to the many industries of Janesville.

The Janesville Silver Plate Company—Messrs. Pool & Hart, Proprietors.

The Works now in Operation on Franklin Street.

The Process of Manufacturing Silver Plate Articles.

Messrs. J. M. Pool and S. P. Hart, who have lately associated themselves together under the name and firm of the Janesville Silver Plate company and who for the past six weeks, have been making preparations for the manufacture of silver plate goods in this city, have finally succeeded in partially completing their labors, and are now manufacturing the above goods. The company have located on North Franklin street, in Mr. E. S. Woodruff's new brick building, north of the railroad track. The building is one hundred feet front on Franklin street, by forty feet deep, two stories high and basement. The silver plate company occupy the entire upper floor of this building. The company have now in operation one of the finest arranged and most complete silver plate and Britannia ware manufacturers in the west, though at present working but a small force, owing to delays of machinery and materials enroute from the east. The company already have a large number of orders to fill, and when in perfect working order, will employ from fifteen to twenty skilled mechanics, and expect by the close of the present year to work fully thirty workmen. With the great growth of the west, the demand for goods of their manufacture increases, so that they may reasonably expect to enlarge their business so as to eventually employ several hundred hands. These works, though new in name, have been successfully operated for the past few years at Milwaukee by Mr. Hart, one of the present firm, who has built up a excellent reputation and trade among the wholesale dealers of the principalities in the west and on the Pacific coast, the specialty of goods to be manufactured by the present company, and it was to enlarge the works to meet the demand for their goods that the present company was organized and the works moved to this city. That the works are perfect in every detail can be seen by any one, even though not familiar with the operations, by an inspection of the various mechanical departments into which the building is divided; the neat and attractive appearance of every thing pertaining to the manufacture of silver-plated goods, indicates that now but the best of work will be sent out from this factory. The assortment manufactured at present consists of breakfast, dinner and pickle casters, hotel sugars, creams, butter dishes, spoon holders, cups, glass trimmings, soda fountain fixtures, inkstands, novelties, &c., &c., principally for the wholesale jobbing trade. The company will sell no goods at retail from the factory, but as soon as orders now on hand are filled, goods of their manufacture will be on sale by the local dealers of this city.

A speciality of this company will be the repairing and re-plating of ware for the trade. Price lists, covering every known article of plated ware for family use or otherwise, will soon be in the hands of all dealers of plated ware throughout the west, and the residents of Janesville and vicinity, can rely upon honest and satisfactory work.

The process employed in silver plating are very interesting, and a description is here given in the hope that the readers of the Gazette may be interested in the same. The work commences in the casting room. Here the metal is made from block tin into white metal, which is the base of all hollow-ware goods manufactured by this company. The metal, after mixing, is cast into plates, is rolled and reduced to any desired width or thickness. The trimmings for work are cast in brass moulds, which are of great value. The metal, when rolled, is then cut into blanks, and are spun over "chucks" and formed into shape for the desired pattern. This work is done on lathes similar in construction to those used in ordinary machine shops. The residence was tastefully decorated with flowers and the nipples were performed under a horseshoe in the center of the back parlor, in the presence of the immediate friends and relatives of the family. Curtis M. Treat, of Racine, was married yesterday to Jennie M. Harrington, daughter of Col. Harrington, at the house of the bride's parents, No. 1623 Cedar street. The Rev. Arthur Piper, of Racine, officiated at the ceremony.
